PROBLEM -SOLUTION FIT TEMPLATE

Date	08/03/2026
Team ID	SWTID-2026-2404
Project Title	Smart library request workflow in service now
Maximum Marks	4

1. PROBLEM STATEMENT

Many libraries still manage book requests and service requests manually. This causes delays, miscommunication, and difficulty in tracking requests. Students and staff may not know the status of their requests, and librarians have to handle multiple requests without an efficient system.

2. TARGET USERS

Students
Faculty / Staff
Librarians
These users need a simple and efficient way to request and manage library services.

3. KEY PROBLEMS

Manual request process takes more time
No proper tracking of book requests
Communication gap between users and librarians
Difficulty in managing multiple requests
Lack of transparency in request status

4. PROPOSED SOLUTION

The Smart Library Request Workflow in ServiceNow provides an automated platform where users can submit and track library service requests online. The system uses ServiceNow workflows to manage requests, assign tasks to librarians, and send status updates to users.

5. How the Solution Solves the Problem

Users can submit requests through the ServiceNow portal
The system automatically assigns tasks to librarians
Request status is updated in real time

Problem – Solution Fit:
Smart Library Request Workflow in ServiceNow

Problem Statement

- Many libraries still manage requests manually, causing:
  - Delays & miscommunication
  - Difficulty tracking requests

Target Users

- Students
- Faculty / Staff
- Librarians

Key Problems

- Manual request process takes more time
- No proper tracking of book requests
- Communication gap between users & librarians
- Difficulty managing multiple requests
- Lack of transparency in request status

Proposed Solution

The Smart Library Request Workflow in **ServiceNow** automates request management, sends notifications, and provides a Self-Service Portal for users.

How the Solution Solves the Problem

- Submit requests online
- Auto-assign tasks to librarians
- Real-time request status updates
- Notifications via email / portal

Value / Benefits

- Faster *request processing*
- Improved user-librarian communication
- Transparent request tracking
- Reduced manual workload

Value / Benefits

- Faster request processing
- Improved user-librarian communication
- Transparent request tracking
- Reduced manual workload

Automated, Transparent, Efficient library *request system* using **ServiceNow**

- Autornated request management
- Transparent tracking & notifications
- Efficient library service management
